Power

Editorial Index · Volume 116 January–December 1972

SUBJECT INDEX

AIR, GAS & LIQUID HANDLING

Air dryers, aftercoolers, and filters	Dec	21
Compare your low-NPSH pumps carefully	Feb	44
Compressing air for industry and utilities	April	17
Consider cathodic protection for water storage tanks, too	Feb	46
Fine filters challenge the NL compressor	Oct	104
Fluid transients in power plant systems	July	74
Grooved pipe joints offer savings over welded joints	March	65
Inducer blades cut into required NPSH	Oct	105
New equipment to extrude heavy-wall pipe will serve both fossil and nuclear needs	March	63
Pumps--POWER SPECIAL REPORT	June	s.1
Predict valve noise--then cure it	Aug	64
Profit from experience in maintaining centrifugal compressor	Jan	52
Pulsating flow in vertical can pump...led to steps to remove violent and noisy vertices...which yielded at last to cage-like suppressor	Aug	63
Today's sealing better than ever	Sept	21
Valve maintenance-What do new materials, details mean?	Jan	54
Vertical turbine pump is a slurry handler	May	82
Wanted: A better test for effect of insulation on stress-corrosion cracking	May	84

ENGINES, TURBINES, GENERATORS

Churchill Falls will up Canadian power by 20%	Sept	63
Know how your generator accepts load	Oct	45
Turn-to-turn testing improves coil life	Dec	44
A little care goes a long way with standby generator sets	Jan	55
Backup power for buildings	July	55
Evaluate drivers for peaking generators	July	54
Gas turbine for emergency power	March	42
Gas turbines fire heavy oils	May	60
Maintaining gas turbine in pipeline service	Feb	56
Mile-high site gets quality power from all-fuel package	March	40
Minimize downtime of steam turbines in industrial plants	Jan	56
Real-time check on lube oil makes progress	Feb	58
Regulators for gas-turbine generators	April	71
Tips on storing electric rotating machines	Jan	59
Turbine-driven fans increase plant output	June	97
Wash gas-turbine compressor	Jan	57
Why solid-state voltage regulators?	Aug	39
Gas turbines-PLANT DESIGN REPORT	Nov	s.11
In-plant electric generation-PLANT DESIGN REPORT	Nov	s.16
Oil and gas engines-PLANT DESIGN REPORT	Nov	s.22

ENVIRONMENTAL MANAGEMENT

Air-pollution control: Its dual effect on the chemical industry	July	44
Air pollution control: Its impact on the metal industries	April	56
Are licensing delays really necessary?	June	80
Benefit from waste-water treatment experience	May	46
Controlling radioactive discharges from water-cooled reactors	Aug	21
Designing large wet-scrubber system	Feb	67
Electrostatic precipitators: A big job gets bigger	Jan	68
EPA: A first-year progress report	March	23
EPA spreads the word	Sept	57
Expanding role for activated carbon	Sept	56
How to work with a consultant in setting up an industrial plant energy-conservation program	Sept	54
OSHA simplified at Chicago meeting via candid discussions	Dec	60
Solid future for solid-refuse disposal	Oct	102

HEATING AND COOLING

Advances in air-distribution systems	April	72
Costs soaring? Consider an on-site plant	Feb	24
Energy crisis spurs waste-heat recovery-PLANT DESIGN REPORT	Nov	s.1
Factor of performance--a new concept	Oct	63
Fire safety in skyscrapers	Aug	51
Guidlines for estimating your costs when considering contract maintenance for air conditioning systems	Jan	78

How to select steel tubing for elevated temperature service — Oct 74
Improved control of absorption chillers — Feb 23
Incentives grow for heat reclamation — July 65
Match heating loads with modular boilers — June 102
New tower design eliminates fill — April 75
New method takes heat gains into account — Sept 94
Offshore power plants--a challenge in design — March 51
Plastic pipe for underground system — March 53
Recover waste heat systematically — Dec 36
Save on power costs with correct water treatment — May 62
Standby power helps keep glass moving — May 63

INSTRUMENTATION & CONTROL

Automation improvers building maintenance procedures — Jan 87
Boiler Controls — Oct 21
Ever transmit data via telephone lines? — April 82
Improve turbines at new facility — Dec 47
Measure water flow with sound waves — June 77
Mobile testing service for utilities — Sept 37
Pinpoint system failures with CRT — May 75
Quality assurance: Providing it, proving it — May 72
Reduce boiler operation costs with metering controls — June 78
Stability--key to liquid-level control — Sept 35
Three steps to DDC — Dec 46
Transmitters today — July 17
Two-plane balancing--step by step — Aug 76
Ultrasonic techniques can guard underwater structures — Feb 28
Utility survey pinpoints computer usage — March 54
Want precise, economical alignment? — Feb 27

MAINTENANCE AND LUBRICATION

Early decisions can prevent gear noise — Oct 42
Fire-protection gets new impetus — March 92
Gas turbine-generator oil system benefits from new flushing and cleaning standard — Dec 33
Good startup helps reducers live longer — Feb 74
Important properties of fluid lubricants — July 35
Low-cost system readies waste oil for boilers — Aug 78
Lubricant additives bow to environmental demands — April 50
Mechanical adjustable-speed drives today — March 90
New analyzer ferrets out particles in lube oil to get clues on machine wear — May 35
Phosphate esters need planned filtration — Oct 41
Seven-point plan gets high-speed gears on line--and keeps them going — Aug 79
Small extra effort pays off with worm gear-reducers — Jan 74
Synthetic lubricants take another step ahead — Sept 44
Taking mystery out of mist lubrication — June 67
Timing belt with rounded teeth delivers higher torque — May 37
What wear patterns tell about bearings — Jan 75

PLANT ELECTRIC SYSTEMS

Arrange for an adequate power supply--Today's Electric Practice, part 3 — Dec 34
Get the standby power you need — May 23
How much electrical maintenance is needed? — Jan 90
How to select batteries for standby power — Feb 30
Instruments aid maintenance effectiveness — Jan 93
Motor conduit box can be nonmetallic — Aug 42
OSHA covers electric system design — April 40
Reduce electric equipment noise — July 56
Route power plant cables by computer — June 100
Select your system voltage carefully--Today's Electric Practice, part 2 — Oct 56
Sine-beat tests verify switchgear seismic capability — Aug 41
Solid-state overcurrent relays bow in — March 79
Solid-state overcurrent relays shape up — Sept 74
Start system plant with load estimates--Today's Electric Practice, part 1 — Sept 76
UPS eliminates computer transient errors — Feb 32
UPS protects burner controls — Dec 45
Water immersion tests quality of insulation — March 81

STEAM GENERATION

Automatic chemical-treatment systems produce high-quality boiler feedwater — March 75
Boiler maintenance--the key to troublefree operation — Jan 39
Can fuel additives help reduce boiler maintenance? — Jan 42
Considerations in clarifying raw water for industrial use — Feb 42
Fossil-fired central stations-PLANT DESIGN REPORT — Nov s.2
Industrial steam-PLANT DESIGN REPORT
Getting industrial boilers into operation — Dec 59
Prevent low-water damage to boilers — April 31
Reduce nitrogen-oxides emissions — Sept 83
Reduce operating costs through maintenance — May 93
Remove organics from feedwater makeup — July 33
Sewage effluent for boiler feed — March 77
Specifying startup tests for industrial boilers — Feb 41
Systems available for removing oil soot from precipitator hoppers — June 57
Transport coal by conveyor — July 34
Trouble-free recovery boiler coming up — Oct 35
Underwater TV enchances reactor availability — March 78

EDITORIALS

Are environmentalists out of step?	July	11
Does desk-pounding always pay off?	Feb	9
Energy recovery and H. R. 14218	May	11
Environmental awards and you	Aug	13
How concerned are we about boiler safety?	Sept	11
How to speak about things...to people	Nov	7
OSHA and boiler safety valves	Oct	11
OSHA and plant mechanical systems	May	9
OSHA: What it means to you	Jan	23
SO_2--Are we moving too fast?	April	9
The 1972 Environmental Awards Program	March	11
Tommorow as others see it	Dec	13

DATA SHEETS

Sizing gas-turbine silencers	Jan	148
Water capacity of circular tanks	Feb	152
Fluid velocity through heat exchanger tubes	March	166
Circulating water flow for nuclear plant cooling towers	April	138
Film coefficients for water in heat-exchanger tubes	May	156
Locked-rotor current for standard induction motors	June	164
Calculating percent excess air for combustion	July	116
Wall thickness and arch length of U-bent tubes	Aug	118
Commonly used valve symbols	Sept	160
Locked-rotor current for standard induction motors	Oct	144
Operating cost for nuclear and fossil-fired plants	Dec	98

AUTHOR INDEX

Anderson, Gerald D.
Stability--key to liquid level control — Sept 35

Baranowski, L. B.
Phosphate esters need planned filtration — Oct 41

Baumeister, A. J. & C. H. Britt
Two-plane balancing--step by step — Aug 76

Becker, Herbert P.
Factor of performance--a new concept — Oct 63

Bell, William E, & David E. Simon
Considerations in clarifying raw water for industrial use — Feb 42

Bird, R. H.
Pulsating flow in vertical can pump...led to steps to remove violent and noisy vortices...which yielded at last to cage-like suppressor — Aug 63

Blake, Richard T.
Save on power costs with correct water treatment — May 62

Bradley, W. A.
Early decisions can prevent gear noise — Oct 42

Clagett, G. A.
Underwater TV enchances reactor availability — March 78

Colaiaco, A. P. & E. G. Fischer
Sine-beat tests verify switchgear seismic capability — Aug 41

Crabtree, G. & Lage, L.
Vertical turbine pump is a slurry handler — May 82

DelBueno, R.
Gas turbines fire heavy oils — May 60

Doolen, John
Inducer blades cut into required NPSH — Oct 105

Dworak, R. A.
Regulators for gas-turbine generators — April 71

Eller, M. H.
Getting industrial boilers into operation — Dec 59
Specifying startup tests for industrial boilers — Feb 41

Ellison, W. & R. M. Mark
Designing large wet-scrubber system — Feb 67

Freeman, M. L.
Predict valve noise-then cure it — Aug 64

Gilbert, L. F.
Reduce boiler operating costs with metering controls — June 78

Hillen, R. J.
Tips on storing electric rotating machines — Jan 59

Hollowood, H. B.
Reduce elctric equipment noise — July 56

Hubbard, H. B.
Quality assurance: Providing it, proving it — May 72

Jarvis, G.
Maintaining gas turbines in pipeline service Feb 56
Karr, L. A., M. E. Knebel & A. A. Villani
Route power-plant cables by computer June 100
Kohan, A. L.
Prevent low-water damage to boilers April 31
Lage, L., & G. Crabtree
Vertical turbine pump is a slurry handler May 82
Lamont, J. W. & J. R. Tudor
Utility survey pinpoints computer usage March 54
Lordeon, John
Why solid-state voltage regulators? Aug 39
Mack, William C.
How to select steel tubing for elevated-temperature service Oct 74
Macura, E. A. & P. A. Sanghavi
Turn-to-turn testing improves coil life Dec 44
Males, R. H.
Are licensing delays really necessary? June 80
Mark, R. M. & W. Ellison
Designing large wet-scrubber systems Feb 67
Mills, L.
Recover wast heat systematically Dec 36
Mohr, J. C. & P. Farinas
Solid-state overcurrent relays bow in March 79
Solid-state overcurrent relays shape up Sept 74
Moore, R. C.
Know how your generator accepts load Oct 45
Mucha, E. & E. Makay
Fluid transients in power plant system July 74
Nordheimer, C. L.
UPS eliminates computer transients errors Feb 32
Ohlsson, L.
How to select batteries for standby power Feb 30
Ottaviano, Victor B.
Grooved pipe joints offer savings over welded joints March 65
Guidelines for estimating your costs when considering contract maintenance for air conditioning systems Jan 78
Pearce, M. L.
Wanted: A better test for effect of insulation on stress-corrosion cracking May 84
Segeler, C. George
Match heating loads with modular boilers June 102
New method takes heat gains into account Sept 94
Simmonds, L. B.
Motor conduit box can be nonmetallic Aug 42
Tamewitz, W. E.
Water immersion tests quality of insulation March 81
Tarbay, P. C. & H. M. Rivers
Automatic systems produce high-quality boiler feedwater March 75
Weyman, G. D.
Remove organics from feedwater makeup July 33
Winkelman, F. W.
Systems available for removing oil soot from precipitator hoppers June 57
Wooster, Arthur R.
Fine filters challenge the NL compressor Oct 104
